

Ali Elgharabawi

Web and Automation Developer

Riyadh, Saudi Arabia | alibnelsayed@gmail.com

Profile

Has built internal systems, workflow automations, personal websites and mobile apps. Started learning Python in 2019. Combines development and automation with a background in graphic design and video content production.

Skills

- Python, JavaScript and Node.js
- HTML, CSS, React and Tailwind CSS
- n8n workflow automation

Selected Development Projects

Business Website Concepts

- Created 31 independent website concepts for businesses, presented as speculative design proposals.
- Built responsive pages with HTML, CSS and JavaScript, including service sections, contact links and demonstration inquiry forms.

Service Intake Automation Prototype

- Created an n8n workflow prototype with fictional intake records, normalization, validation, batch duplicate detection and route classification.
- Verified the embedded JavaScript with 10 local checks. n8n engine execution is not yet verified.

Design and Content Experience

More than 8 years of experience in graphic design, alongside video scripting, filming and editing.

TikTok creator [@ali121ph](https://www.tiktok.com/@ali121ph) with approximately 100,000 followers. Personally scripted, filmed and edited videos, and presented on camera. All videos are currently archived.

Design and video tools: Photoshop, Adobe Premiere Pro, CapCut and DaVinci Resolve.

Languages

English: Basic. Understands everyday English and speaks simply; prefers written communication initially.
